

JUMP START COURSE

Does the thought of teaching your teen how to drive make you feel anxious 🤔? Or perhaps you have already been out for a few lessons with them, only to have it end in an argument 😡😡?

Teaching new drivers can be a stressful time for all involved; testing the most solid relationships. We find many parents prefer to have a professional instructor do all of the teaching & practice (*too scary or too many arguments!*) OR to do all of the teaching and practice themselves (*too expensive!*). We've always recommended a **joint effort** between **parents/supervisors** and a **professional driving instructor** to give the learner driver the best preparation possible for their driving future.

JUMP START is an investment in your learner driver's safe driving future.

We have developed the JUMP START course to help learners & their supervisors achieve the 120 practice hours necessary to pass the new Restricted Licence test (in effect Feb 2012). The course is made up of both theory & practical elements and will provide the tools to:

- give parents/supervisors the **confidence** to take practice sessions
- **prevent arguments**, tears & door slamming
- keep the **costs** of instruction **to a minimum**
- get the learner **up-skilled and competent** faster

One of our **qualified, patient instructors** will get the learner started with the basics and build their **skill and knowledge** to a point where parents/supervisors can feel confident to step in and provide **regular practice** sessions between their professional lessons. The combination of professional instruction and regular practice will help to the learner to retain more from their lessons plus you will save \$\$\$ in the long run as they will require fewer lessons overall!

The Jump Start course includes:

- 1 hr **Theory session** for the learner driver & their supervisor covering lesson structure, tips & tricks, pit falls to avoid and generally preparing both learner & supervisor for the road ahead.
- 2 X 1 hr **practical 'on road' sessions** for the learner driver & their supervisor introducing basic car control, stopping & starting safely, gear changing and dealing with intersections. If the learner has already had some practice or experience the instructor will cover more advanced topics based on their needs & skill level.

Its important that the supervisor attends all three sessions with the learner driver. We schedule the theory sessions at varied times including afternoon, evening & weekends to fit in with different life-styles. The practical session times are booked with an instructor at the end of the theory session for a mutually suitable time.

The course costs \$160 per learner driver—the supervisor(s) attend for free (i.e. if both parents will be involved in the practice sessions then both are welcome to attend)

To make a booking phone us on 04 478 9876 or alternatively you can find course dates & make a [booking online](#) via our website.
